

HOW TO SET UP THE VERSA PRO 360:

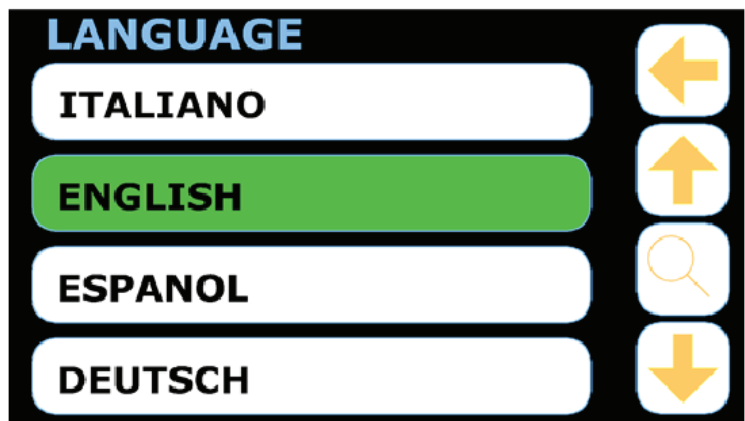

01.

Plug in the VP 360 in the power outlet (110 V). Start the machine by Green On Button and follow the instructions.

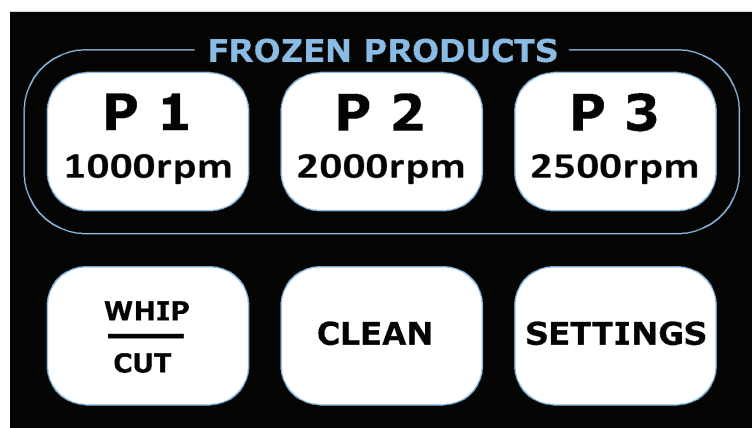

02.

When starting the machine for the first time, select your preferred language from the options shown to the right:

03.

Once the Language, Time and Date are set up, the Versa Pro 360 will switch to HOME Screen as shown to the right:

YOUR VERSA PRO 360 IS READY FOR PROCESSING!

HOW TO OPERATE THE VERSA PRO 360:

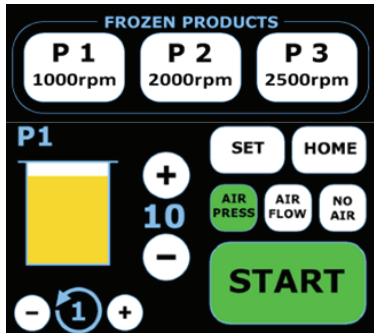

01.

Push Power button to start the system and remove lid from a frozen beaker and place it in the beaker holder

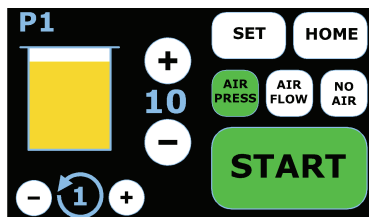

02.

Attach the beaker holder to VP360 and securely lock it on the machine by turning it from right to left (clockwise)

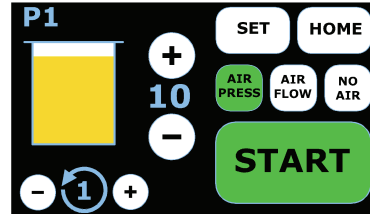

03.

Select the desired setting (P1, P2 or P3) and choose the number of the portions by using "+" or "-" button

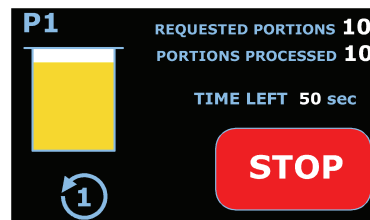

04.

The Air Pressure function is set for "Air on" by default. You can change the pre set function by choosing another option (Air Flow or No Air)

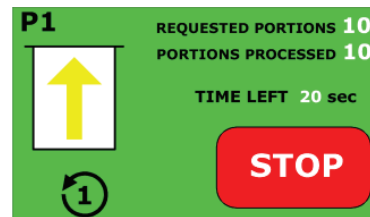

05.

Press the Start Button

06.

The machine will start the cycle and show you the progress of the portions

07.

Once the desired number of portions is completed, the blade will retract and the VP360 will depressurize the beaker automatically

08.

When the process is completed, the VP360 will display the end of cycle with information on the portions and time

WE HOPE YOU ENJOY YOUR NEW VERSA PRO 360!
